

A successful partnership

The extensive building works undertaken as the Sesquicentenary Project were managed both on time and on budget. The huge success of the Sesquicentenary Project is largely thanks to the seamless collaboration between all members of the Project Control Group (PCG), plus the various consultants on the project, all the way from concept to completion. The PCG kept the project moving effectively and efficiently.

Architects, Budden Nangle Michael & Hudson, who specialise in educational and research facility master planning, worked to a tight and challenging set of requirements outlined by the College. This cooperation was especially important to meet these high demands and ensure minimal impact on the operation of the College and boys' learning. This included a design that was in-keeping with Newington's heritage context, creating transparent and gently reflective facades of clear glazing with high thermal and acoustic performance, ensuring access across the College campus and creating a centrepiece of the College with the new Sesquicentenary Quadrangle.

Cadence Australia Pty Ltd, who specialise in project management consultancy spanning the development and construction sectors, worked collaboratively and strategically with the College, and specifically the PCG,

“This cooperation was especially important to meet these high demands and ensure minimal impact on the operation of the College and boys' learning.”

to ensure that the Sesquicentenary Project reached successful completion. They were the conduit between the College and the main contractor, AW Edwards Pty Ltd.

AW Edwards Pty Ltd lived up to their reputation of enhancing their clients' investments by constructing a quality end product for the College. Their management and staff, plus the numerous sub-contractors worked well at all times to deliver buildings that enhance the College's facilities and that sit proudly alongside the Founders Building.

The project objectives could not have been achieved without the close co-operation of everyone involved.

Thank you

Capital gifts enhance education by providing Newington boys with some of the finest facilities available. Capital gifts are crucial to Newington's ability to build and maintain excellent facilities and provide new learning tools for all boys.

The College is thrilled and proud to have such a supportive culture of philanthropy throughout our community and wishes to thank every person that made a contribution towards the realisation of these facilities. To view a complete list of 2012 donors please visit:

www.newington.nsw.edu.au/community/foundation/.

Each and every boy will benefit from this generosity—in our Sesquicentenary and for many generations to come.

The College would also like to thank the Old Newingtonians' Union for its generous offer of financial support for the Old Boys Lecture Theatre and the Parents and Friends Association for its generous offer of financial support for the Careers Resources Centre.

The Capital gifts appeal is an ongoing campaign. For more information, please visit the Community and Foundation pages of the College website: www.newington.nsw.edu.au

Additionally, particular thanks should go to:

- Ray Hudson, Alex de Belin and the entire team at Budden Nangle Michael & Hudson, Architects
- Bruce Edwards, Chris Mulvey, Paul Maher, Andrew Merchant and the entire team at AW Edwards, Builders.
- Ron Murphy, Steele Clarke and Eric Brodie, Project Managers at Cadence Australia

The many consultants and sub-contractors, including, but not limited to:

- M+G Consulting, Structural and Civil Engineering
- Shelmerdines, Electrical and Mechanical Engineering
- SEMF, Hydraulic and Wet Fire Services
- Rawfire, Fire Engineered Solutions
- POD Landscape Architecture, Architectural Landscape Design
- Nicole Anderson, Anthony Fretwell and Petri Kurkaa for the photography in this publication.
